

Edition: 2024/2025 Software Development Bachelor in Computer Science and Engineering: Standards on the Use of Generative AI Tools in Software Development	 uc3m Universidad Carlos III de Madrid
--	---

Student Statement of Use

Every student who uses generative AI in an activity must declare its use in a transparent manner. To do this, this must be used to declare the use of AI.

Student's Name	Nicholas Kea & John Osajie
Subject	Software Development
Task title	GE2
Delivery date	26-03-2026
1. Use of generative AI	
- Tool used	Claude, Gemini
- Date of use	20-03-2026 – 26-03-2026
- Description of use	(Example: "I used ChatGPT to generate code examples <code> which I then manually modified and optimized.")
2. Prompts used	Used Claude for clarification on setup steps, terminal errors, and formatting guidance. All design decisions, test cases, and implementation logic were our own.
How did you use or change the AI-generated result?	All suggestions were reviewed, tested, and modified before use. Many AI generated results were simply clarifying or confirming work and suspicions we had already done on our own.
AI-generated results	(Attached including AI-generated content).
Confirmation of compliance with copyright guidelines	Confirm
Student Signature	It will not be necessary if the signature is delivered digitally by Aula Global. If it is delivered on paper, it will be necessary.
